Consumer Price Index ◆ January 2009

Consumer Price Index (2002=100)

Highlights

- British Columbia's Consumer Price Index (CPI) rose 1.4% from January 2008. This was the second highest increase (tied with Ontario and Manitoba) among the provinces. Saskatchewan had the highest year-over-year inflation at 2.4%, while three provinces experienced deflation, with New Brunswick posting the greatest price declines (-0.5%). Nationally, prices increased 1.1% from a year ago.

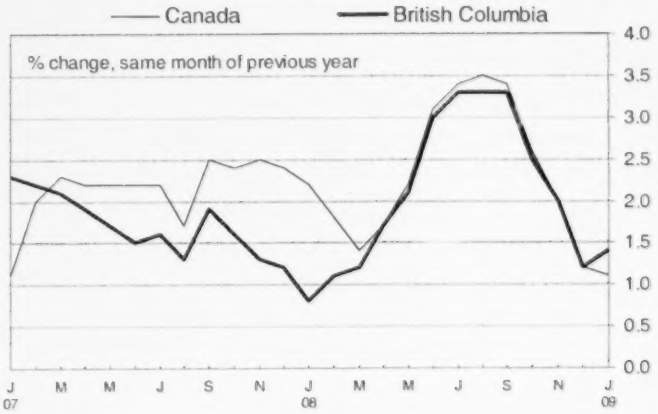
- Among the metropolitan areas, Regina posted the greatest increase in consumer prices (+2.9%) from last January, with Saskatoon not far behind (+2.4%). Residents of Saint John experienced price declines (-0.3%) compared to a year ago. Prices rose 1.6% in Vancouver and 1.5% in Victoria from January 2008.

- BC's energy prices in January were 7.4% below the levels seen in the same month of 2008. Significant price declines for fuel oil (-16.1%) and gasoline (-14.8%) were the main contributors. Private transportation costs declined (-5.1%), while clothing prices also dropped (-3.2%) from last year. However, food prices rose 7.0%, largely driven by significant increases in the price of fresh vegetables (+20.8%), bakery & cereal products (+12.8%) and fresh fruit (+12.2%). Other notable cost increases were posted for piped gas (+7.8%), dairy products & eggs (+7.0%), meat (+6.7%) and reading material & printed matter (+6.0%).

Note: Statistics Canada will release the February Consumer Price Index on March 19, 2009.

2002=100	All-Items Index	% Change from	
	January 2009	December 2008	January 2008
Canada	113.0	-0.3	1.1
BC	111.4	0.0	1.4
Vancouver	112.0	0.1	1.6
Victoria	111.0	0.0	1.5
Core Canada[1]	112.2	-0.4	1.9

BC and Canada Inflation Trend



2002=100	Latest 12-month Average Index (ending in January 2009)	Latest 12-month Average % Change	2008 Annual Average % Change
Canada	114.2	2.3	2.3
BC	112.5	2.2	2.1
Vancouver	112.9	2.4	2.4
Victoria	111.9	1.9	1.8

[1]**The Core CPI for Canada:** Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

Consumer Price Index—Terms and Definitions

Base Effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.
